Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by Kojima et al. (JP 7-21820).

Regarding claim 1, Kojima discloses a fluorescent lamp comprising an hermetically sealed lamp vessel (12), and a phosphor layer (14) attached to a part of an inner surface of the lamp vessel, wherein a thickness of the phosphor layer near an edge thereof gradually and smoothly decreases towards the edge (Figs. 1 and 5, toward the edge of the lamp closest to the electrode 13).

Regarding claim 2, Kojima discloses a fluorescent lamp wherein the phosphor layer (14) is formed so that a slope is created near the edge, the slope having an acute angle with respect to the part of the inner surface of the lamp (Fig. 1 and 5).

Allowable Subject Matter

Claims 3-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2879

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 3, the references of the Prior Art of record fails to teach or suggest the combination of the limitations as set forth in claim 3, and specifically comprising the limitation of a discharge material that contains mercury, and is enclosed in the lamp vessel, and a coil that is provided outside the lamp vessel, and generates a magnetic field so as to make the discharge material induce plasma discharge.

Regarding claims 4-6, claims 4-6 are allowable for the reasons given in claim 3 because of their dependency status from claim 3.

Other Prior Art Cited

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
